*Ford Otosan Leader*

2025 represented a period of solid operational advancement for Ford Otosan. With the early-year ramp-up of our 1-ton CV program under the Ford-VW strategic partnership, our capacity utilization improved steadily throughout the year. We entered 2026 with strong momentum, marked by the inclusion of our Yeniköy Plant in the Global Lighthouse Network, a prestigious recognition of our digital manufacturing excellence. Looking ahead, our 2026 guidance remains broadly in line with 2025, except for the export volumes supported by the continued ramp-up of the 1-ton CV program. Ford Otosan remains focused on operational discipline and creating long-term value to all stakeholders.

**GÜL ERTUĞ GERİŞKOVAN**

*Finance & Accounting Leader (CFO)*

In 2025, Ford Otosan delivered strong financial and operational results, aligned with our guidance. We improved our profitability, achieved record sales and production volumes, and maintained healthy revenue growth. Disciplined working capital management supported a significant improvement in our cash cycle and drove robust cash generation. At the same time, our leverage ratio improved meaningfully, further strengthening our balance sheet. As we near the end of our intensive investment cycle, capital expenditures will begin to normalize in 2026, supporting a more balanced and resilient cash profile alongside operational and financial performance that is expected to remain broadly consistent with this year.

(1) Ford Otosan reports company EBITDA as 'Adjusted EBITDA'. Adjusted EBITDA includes Operating Profit rather than EBIT ("Other Income/Expense from Operating Activities" in P&L are considered as part of the Company's core operations), the embedded lease impact and depreciation & amortization.

(2) Includes only fixed asset investment.

### Domestic Performance

Contrary to early 2025 contraction expectations, Türkiye automotive market grew 10% YoY and reached to a new record of 1.4 mn units, with monthly sales surpassing 100k from March onwards. This strong performance was primarily driven by i) intense price competition stemming from aggressive sales campaigns, ii) shifting macroeconomic concerns, iii) front-loaded demand ahead of SCT hikes, iv) the wealth effect created by rising gold prices, v) improved vehicle availability, vi) the upward revision of the EV SCT base threshold.

During this period, Ford Otosan recorded domestic retail sales of 117,048 units, marking the highest level achieved in the past decade. We maintained 3<sup>rd</sup> place in the overall market with an 8.3% (8.9%) market share. We strengthened our undisputed leadership in the CV segment, capturing a 28.6% (28.7%) market share. Our market share stood at 24.0% (20.6%) in LCV, thanks to higher availability in Courier, 35.3% (38.8%) in MCV, and 22.7% <sup>(6)</sup> (25.4%) in HCV. In the PC segment, our market share was 2.4% (3.0%), impacted by changes in SCT exemption criteria <sup>(7)</sup> and intensified pricing competition.

## Export Performance

In 2025, The European and UK automotive markets, our key export markets faced a mixed environment. Commercial vehicle demand was constrained by a challenging economic setting, with limited fleet investment and structural factors such as high production costs and insufficient charging infrastructure weighing on growth. While government support measures like grants and depot charging schemes offered support, the overall pace of transition toward electrification remained below targeted levels, adding pressure to industry dynamics.

Passenger car demand showed relative stability. Registrations increased modestly, supported by improved vehicle supply, government incentives, and rising consumer interest in electric vehicles. Despite ongoing economic and geopolitical headwinds, the sector benefited from policy support and a gradual recovery in consumer confidence.

As a result, the EU + UK PC market <sup>(3)</sup> grew modestly by 2.1% YoY, reaching 12.8 mn units. Meanwhile, CV registrations declined by 8.5% to 2.1 mn units, reflecting ongoing economic pressures and last year's high base. The strength in PC demand helped offset the downturn in CV, keeping the overall market <sup>(3)</sup> increased slightly to 15 mn units.

<sup>(5)</sup> Covers all passenger and commercial vehicles excluding buses and midibuses. / Source: [ODMD](#), [TAID](#) and TURKSTAT.

<sup>(6)</sup> Only HCV ≥ 16-ton data is taken into consideration. TURKSTAT data is taken as basis for brands that are not members of TAID.

<sup>(7)</sup> The upper limit has been increased from 1.6 million TL to 2.3 million TL and the vehicles to be exempted must be 40% domestically produced. Data inside the parenthesis represents 2024 FY numbers.

|                          | 2025       | 2024       | %     |                    | 2025      | 2024      | %     |

| LCV & MCV <sup>(3)</sup> | 1,763,119  | 1,939,673  | -9.1% | HCV <sup>(3)</sup> | 361,579   | 381,593   | -5.2% |

Amidst the contraction in the EU CV market, Ford increased its market share by 1.8% to reach 17.2% and remained Europe's No.1 CV brand for the 11<sup>th</sup> consecutive year in 2025. This performance was primarily driven by strong sales from its refreshed product lineup and value-added services by Ford Pro. Ford Otosan was instrumental in this performance, accounting for 79% of Ford's CV sales in Europe. Furthermore, Ford Otosan reinforced its strategic importance by representing 41% of Ford's PC sales.

In 2025, Türkiye's total vehicle exports rose 4% YoY to 1,058k units, driven by a 28% surge in CV exports to 458k units, offsetting an 8% decline in PC exports to 600k units. Ford Otosan's exports increased by 10% YoY, reaching 603k units - comprising 400k units from Türkiye and 203k from Romania. With this performance, Ford Otosan represented 38% of Türkiye's total vehicle exports and 87% of its CV exports.

## Wholesale Performance

In 2025, Ford Otosan's export volumes rose by 10% YoY to 603k (546k) while domestic wholesale volumes grew 6% to 122k (115k) units. As a result, total sales reached a historical high level of 725k (661k), up by 10%. The shares of our main export markets in total sales are England - 27%, Germany - 18%, Italy - 12%, France - 8%, Spain - 6%, W. Europe - 13%, E. Europe - 9% and other - 7%.

### Production and Capacity

In 2025, Türkiye's vehicle production <sup>(4)</sup> increased 4% YoY, reaching 1.4 mn units. PC production declined 4% to 873k units, while CV production rose 19% to 547k units. In Romania <sup>(4)</sup>, vehicle production exhibited a decrease, falling by 3% YoY to 546k units.

Ford Otosan's total production in 2025 increased by 11% YoY to 700k units, driven by the accelerated ramp-up of 1-ton CV in Türkiye. Of the total production, 452k (65%) units were made at Türkiye-based facilities, while the remaining 248k (35%) units were produced at the Craiova Plant. Consequently, Ford Otosan accounted for 32% of Türkiye's total vehicle production and 83% of its CV production. Ford Otosan also represented 46% of Romania's total vehicle production. Our production volumes by model were as follows:

|                                          | <b>2025</b>    | <b>2024</b>    | <b>YoY %</b> | <b>4Q'25</b>   | <b>4Q'24</b>   | <b>YoY %</b> |

In 2025, Yeniköy Plant closed the year with a CUR of 73% supported by the gradual ramp-up of 1-ton CV. Meanwhile, our Romania Plant, which completed the launches of the new Puma Gen-E and E-Courier models in Q1'25, completed the year with a CUR of 83%. Moreover, CUR stood at 71% at Gölcük and 46% at Eskişehir Plants. As a result, Ford Otosan achieved a total CUR of 75% in 2025, in line with both industry and European averages.

<sup>(10)</sup> Export volumes include exports from Ford Otosan & Ford Otosan Romania SRL.

Data inside the parenthesis represents 2024 FY numbers.

## Financial Overview

### Revenue

In 2025, domestic sales volumes rose by 6%, yet domestic revenues declined 6% YoY, to TL170.6 bn (TL180.7 bn). This contraction was mainly due to, i) sales mix effect and ii) competitive pricing pressures. In contrast, robust export performance mitigated domestic pressure, with export revenues rising 10% YoY to TL660.2 bn (TL598.1 bn), supported by the 10% YoY rise in sales volumes and a more favorable EUR/TL exchange rate movement compared to the same period last year (€/TL Change in 2025: 37%; 2024: 13%). Overall, total revenues grew 7% YoY to TL830.8 bn (TL778.8 bn), underscoring the company's resilience and its ability to deliver on full-year revenue growth guidance despite challenging market dynamics. On a regional basis, revenue distribution is as follows: i) 21% (23%) from sales in Türkiye, ii) 79% (77%) from exports (59% from Türkiye, 20% from Romania). Ford Otosan Romania SRL's solo revenue was TL207 bn in 2025.

### Gross Profit

Gross profit came in at TL69.4 bn (TL71.5 bn), representing a modest 3% YoY decline. Accordingly, gross margin stood at 8.4% (9.2%) in 2025. The margin movement primarily reflects the i) impact of competitive pricing from ongoing sales campaigns, ii) a higher share of exports in the revenue mix, and iii) increased COGS driven by the growing share of EV production amid inflationary pressures and FX-related import costs. The composition of COGS is i) 82.4% raw material, ii) 7.0% trade goods sold, iii) 4.5% labor and overhead, iv) 2.1% amortization, v) 0.8% changes in finished good and vi) 3.2% other.

### Operating Profit <sup>(12)</sup>

EBIT <sup>(11)</sup> declined 9% YoY to TL34.9 bn, reflecting softer gross profit and a 4% increase in operating expenses driven by higher warranty costs linked to new model launches, which totaled TL34.5 bn. However, net FX gains from operating activities rose strongly by 76% to TL6.7 bn reflecting the impact of increase in EUR/TL exchange rate. As a result, last year's net other expenses of TL224 mn from operating activities turned into net other income from operating activities of TL7.7 bn in 2025. Consequently, operating profit <sup>(12)</sup> rose by 12% YoY to TL42.6 bn (TL37.9 bn).

<sup>11)</sup> EBIT is calculated as Gross Profit less Operating Expenses (including Marketing, General Administrative and R&D expenses).

<sup>12)</sup> **Operating Profit Impact on Adjusted EBITDA Calculation:** Export sales mainly consist of sales to Ford Motor Company. Payment terms and conditions are specified in the business agreements (EUR-Denominated Cost-Plus Agreements) with Ford Motor Company. Group's export vehicle receivables from Ford Motor Company sales made from Türkiye are due in 14 days and sales made from Romania are due in 30 days. Therefore, income or expenses arising from exchange rate movements during that collection period (which are recorded under "Other Income/Expense from Operating Activities" in P&L) are considered as part of the Company's core operations. In addition to exchange rate movements, "Other Income/Expense from Operating Activities" also includes i) interest income/expenses arising from trading activities and ii) other incomes/expenses like (tax debt offset; rental, commission, licencing income etc.). As a result, Ford Otosan adjusts its EBITDA by adding back the "Other Income/Expense from Operating Activities".

Data inside the parentheses represents 2024 FY numbers.

## Adjusted EBITDA <sup>(14)</sup>

In 2025, the embedded lease impact <sup>(13)</sup> and net other income from operating activities reached to TL6.8 bn (TL3.9 bn) and TL7.7 bn (TL-0.2 bn), respectively. As a result, Adjusted EBITDA <sup>(14)</sup> rose to TL66.6 bn (TL55.9 bn), marking a robust 19% YoY increase. In this period, adjusted EBITDA margin <sup>(14)</sup> expanded to 8.0% from 7.2%. This performance came in above the upper end of Ford Otosan's adj. EBITDA <sup>(14)</sup> guidance. On a per-vehicle basis, adjusted EBITDA <sup>(14)</sup> reached €1,821 (€1,758). Ford Otosan Romania SRL's solo adjusted EBITDA was TL10.9 bn in 2025. The adjusted EBITDA bridge <sup>(14)</sup> is stated in mn TL as follows:

## Profit Before Tax

PBT declined by 19% YoY to TL39.5 bn reflecting the 13% increase in net financial expenses, which rose to TL30.9 bn (mainly driven by a 52% increase in net FX losses including cash flow hedge-related releases). In addition, as the company nears the end of its intensive investment cycle and relatively lower impact of inflation accounting, monetary gains—recorded at TL15.9 bn—provided a more limited contribution to PBT. PBT per vehicle was €1,080 (€1,524) in 2025. Ford Otosan Romania SRL's solo PBT was TL 4.7 bn in 2025.

## Net Income

In 2024, Ford Otosan recorded TL4.1 bn in deferred tax income. Following the suspension of inflation accounting in statutory/tax reporting, this position shifted to deferred tax expenses of TL4.4 bn in 2025, reflecting Ford Otosan's asset-heavy balance sheet structure. In addition, the deferred tax income related to the investment incentive tax asset was realized at a lower level compared to the previous period. As a result, net income for the period declined by 33% YoY to TL34.0 bn (TL50.9 bn). Ford Otosan Romania SRL's solo net income was TL3.9 bn in 2025.

<sup>(13)</sup> **The embedded lease impact:** In line with IFRS 16, Ford Otosan identifies fixed assets used exclusively for the 1 Ton commercial vehicles (Yeniköy Plant) and Puma (Craiova Plant) and reclassifies them from "Fixed Assets" to "Other Receivables" as the lessor. These assets are no longer depreciated or included in the fixed asset register, as they are considered to be owned by Ford Motor Company. The reclassified lease receivables are amortized over the life of the projects based on the planned vehicle sales volumes. Instead of recording depreciation, Ford Otosan offsets these receivables against export revenue, reflecting the recovery of investment through vehicle sales invoices under its cost-plus model. Since the reduction in export revenue effectively represents depreciation, Ford Otosan adjusts its EBITDA by adding back the amount deducted from revenue.

<sup>(14)</sup> Ford Otosan reports company EBITDA as '**Adjusted EBITDA**'. Adjusted EBITDA includes **Operating Profit** <sup>(12)</sup> rather than EBIT <sup>(11)</sup> ("Other Income/Expense from Operating Activities" in P&L are considered as part of the Company's core operations), **the embedded lease impact** and **depreciation & amortization**.

Data inside the parenthesis represent 2024 FY numbers.

(22) This statement is detailed under **footnote 28 in the financial report**. The Group's net foreign exchange position is mainly due to long-term EUR denominated loans obtained to fund its investments. The Group is hedging for the foreign currency exchange risk arising from its EUR denominated long-term loans with export agreements signed with Ford Motor Company. The TRY equivalent of such loans amount to TL86,222 mn as of 31 December 2025 (31 December 2024: TL70,789 mn). As of 31 December 2025, the Group has a total of TL 16,514 mn (31 December 2024: TL 24,447 mn) of the finished goods to be used in vehicles to be exported.

## Guidance

Ford Otosan provides guidance 4 times a year as part of quarterly financial statements. This is the first guidance issued for 2026 as part of the 2025YE results in February.

(23) Ford Otosan reports company EBITDA as '**Adjusted EBITDA**'. Adjusted EBITDA includes **Operating Profit<sup>(12)</sup> rather than EBIT<sup>(1)</sup>** ("Other Income/Expense from Operating Activities" in P&L are considered as part of the Company's core operations), **the embedded lease impact** and **depreciation & amortization**.

## About Ford Otosan

Ford Otosan (Ford Otomotiv Sanayi A.Ş.), a publicly traded company with Ford Motor Company and Koç Holding each holding a 41% share, has been Türkiye's automotive export leader for 14 years and Türkiye's goods export champion for 10 years. In 2025, it generated \$15.4 bn in export revenues from more than 86 countries. Operating in five locations, including plants in Gölcük, Yeniköy, Eskişehir, and Craiova, as well as an R&D center in Istanbul, Ford Otosan employs over 25k people. With the largest R&D team in Türkiye's automotive sector, it is also the most valuable automotive company on Borsa Istanbul. Ford Otosan is the largest commercial vehicle production hub in Ford Europe, with a 2025 production capacity of 934.5k vehicles, 430k engines, and 112k rear axles.

## Special Note Regarding Forward-Looking Statements

This document may contain forward-looking statements and figures that reflect the Company management's current views with respect to certain future events based on the base-case assumptions. Although it is believed that the expectations reflected in these statements are reasonable under current conditions, they may be affected by a variety of variables and changes in underlying assumptions that could cause actual results to differ.

## Accounting Principles

With the Capital Markets Board of Türkiye's Bulletin dated December 28, 2023, numbered 2023/81, CMB announced that issuers and capital market institutions shall prepare their annual financial statements ending on December 31, 2023, or later, in accordance with IAS 29 inflationary accounting provisions. Therefore, the consolidated financial statements of Ford Otosan are prepared in accordance with Türkiye Financial Reporting Standards ("TFRS") as per regulations of the Capital Markets Board of Türkiye ("CMB"). Accordingly, this documents on 2025YE financial results contain Ford Otosan's audited financial information prepared according to Türkiye Accounting / Financial Reporting Standards by application of IAS 29 inflation accounting provisions, in accordance with CMB's decision dated December 28, 2023.
